

Accessibility snapshot

Salisbury University · public Confluence pages at su-support.atlassian.net · 15 September 2026

We checked a random sample of 80 pages from su-support.atlassian.net, drawn from 848 that anyone can open without logging in. Each page went through automated checks mapped to WCAG success criteria at levels A and AA. Only failures the checks can confirm with certainty are counted.

52 of 80 pages (65%) have at least one such failure.

What comes up most

Failure	Pages	Instances
Image has no alternative text	39	204
Alternative text does not describe the image	14	92
Table has no header row	9	10
Heading level is skipped	4	4

Five pages to start with

1. [How do I make lists or links more interesting on my pages?](#)
Alternative text does not describe the image (21), e.g. “readability.png”
2. [Workday-FIN: Payment Management and Settlement](#)
Image has no alternative text (18) · Table has no header row (2)
3. [Holds on your account in GullNet](#)
Link text does not say where it goes · Table has no header row
4. [Adjusting your time zone in Microsoft Outlook](#)
Alternative text does not describe the image, e.g. “calendartime.png”
5. [Using Microsoft Teams During a Campus Network Outage: Accessing Meetings and Chats via Alternative Connections](#)
Heading level is skipped

Fixing the most common one

Image has no alternative text. Select the image, open the image toolbar and add alt text that conveys the same information as the picture. If it is purely decorative, mark it as decorative so it is skipped.

Why it matters

As a public university, Salisbury University is covered by the US Department of Justice's ADA Title II rule, which sets WCAG 2.1 level AA as the standard for web content. Since the April 2026 extension, the compliance date for state and local government entities serving a population of 50,000 or more — which generally includes state universities — is 26 April 2027. Every failure in this report maps to a success criterion that already exists in WCAG 2.0 and 2.1.

Want the rest? Reply and we will send the complete page-by-page list for this sample, at no cost.

What this is not: automated checks find part of what WCAG asks for and cannot establish conformance on their own, and a sample is not an audit. Pages were read through Confluence's public API, following the site's robots.txt crawl delay. Source for the rule above: [Federal Register, 20 April 2026, document 2026-07663](#).
